

400 Series Plus Lighthead

NEW PRODUCT • MARKET ADVISORY

MA:0047 • 06/2023

Designed for lower-level mounting, the **400 Series Plus** warning lighthead builds on the original 400 Series' reputation for commanding attention with its versatility and performance. The improved lighthead has been refined to decrease wear and tear on a truck's electrical system with a lower amp draw and stand up to severe weather with our patented E Block™ technology, which prevents air and moisture from entering the unit. Lighthead is available with steady or flashing warning lights, and **SOLO™** or **DUO™** technology. Vertically mounted 400 Series Plus warning lighthead used in DOT systems also include a fluted lens to enhance light spread.

Product Features:

- SAE Class 1 and CA Title 13 (Amber) apply to horizontal and vertical lights
- Linear-LED® design produces highly intense light that has superior wide-angle visibility
- Single-color LED SOLO or two-color interleaved DUO technology
- DUO models include White override option when Color 2 is White
- Connect and flash multiple Whelen devices together or in alternating patterns with Sync
- Built-in flasher included with SmartLED® models
- IP67 rated for dust and water resistance
- E-Block technology prevents air and moisture from entering lighthead
- 12/24 VDC
- Conformal coating provides protection against moisture and vibration
- Amp Draw: 0.8A at 12.8V, 0.4A at 25.6V
- Same mounting footprint and accessories as the original 400 Series

Model	Description	List Price▲
404*0S*R	SOLO Steady, Clear or Color Lens	\$283.00
