SCANport™

HARDWARE

SCANport is a groundbreaking solution that revolutionizes access to vehicle CAN signals enabling seamless automation within CenCom Core® control systems. SCANport uses a nonintrusive method to access CAN signals by monitoring traffic through cable jackets. Its unique clamshell design fits easily and snugly around the CAN cables to read CAN signals without any disruption to the cables themselves and without being physically connected to the vehicle's CANbus. With SCANport, a single harness can accommodate multiple vehicle makes, models, and years, eliminating the need for separate, vehicle-specific harnesses.

FEATURES

- Hardware support for Core™, Core-R™, Core-S™
- 15' Core interface cable and 1' Decoder/Sensor interconnect harness cable included
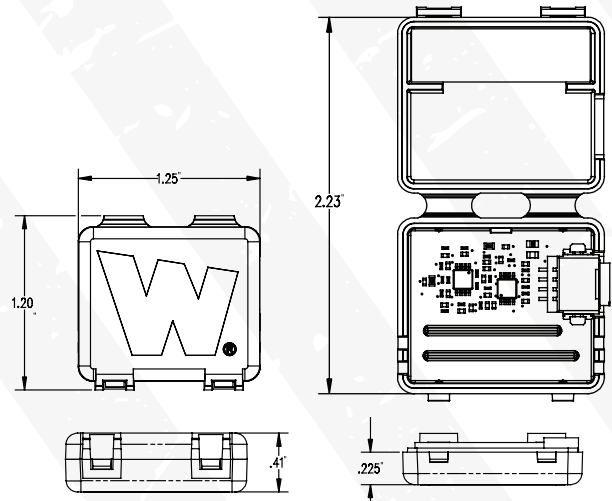

SPECS

Voltage:	10-30 VDC
Current:	Running: 30mA at 12 VDC | 16mA at 24 VDC
	Sleeping: 2mA at 12 VDC | 1mA at 24 VDC
Dimensions:	
Decoder:	1.25" (31.75mm) W x 1.20" (30.48mm) H x 0.41" (10.41mm) D
Sensor:	2.50" (63.50mm) W x 1.75" (44.45mm) H x 0.60" (15.24mm) D
Warranty:	5-year

MODELS

C399SP	SCANPort Installation Kit for C399, See Vehicle Outfitter for available vehicle Make/Model/Year (Not for use with Core-R and Core-S)
C399RSP	SCANPort Installation Kit for C399R and C399S, See Vehicle Outfitter for available vehicle Make/Model/Year (Not for use with Core C399)

SCANport Sensor

SCANport Decoder
