Whelen Engineering is pleased to announce the release of version 2.9.0 for the Whelen Cloud Platform® (WCP®). This update introduces new functionality, system optimizations, and extended vehicle support.
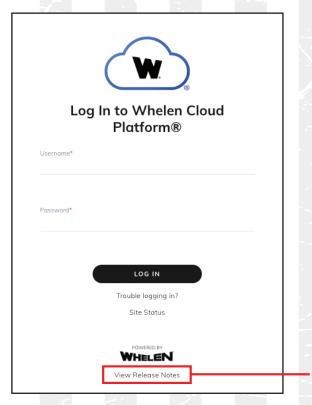

Key Updates in WCP 2.9.0

- **User Alerts Management:** Alerts are now automatically prevented from being sent to deactivated users, ensuring more accurate communications.
- **Expanded Alert Timing Options:** Additional intervals of 15 and 30 seconds have been added to the "Wait to Send Alert" dropdown, providing greater flexibility in alert scheduling.
- **Enhanced Vehicle Maintenance:** Support for Ford F-150 and F-250 models has been integrated, extending the platform's maintenance capabilities.
- **Updated Fleet Data:** The Engine Hours feature has been updated for Ford Explorer vehicles to improve data accuracy.
- **Analytics Optimization:** The default start and end dates on the Analytics Dashboard and Analytics Logs pages are now set to a 1-week range, allowing for more streamlined data review.

Action Required

Restart your Whelen Cloud Platform application to activate these latest enhancements.

For a complete list of changes and improvements, please see the options below.

If you have any questions or require assistance, please contact your Whelen sales representative.

Scan the QR code or click HERE to view a full list of updates.
