

Expanded Peripheral Add-Ons for Core-C® Control System

PRODUCT UPDATE • MARKET ADVISORY

MA:0103 • 10/2024

We are excited to announce a significant **update for our Core-C control systems** with the latest Whelen Command® update, offering expanded peripheral support and increased flexibility in configuring your warning light systems.

CORE-C

What's New:

- **With Core-C, you can now configure any combination of up to ten WeCanX® devices**, providing more options for customization and system design without the need for new hardware or firmware changes. Please note, siren amplifiers and additional control heads - with the exception of the Arges® Remote Spotlight - **are not included** in these configurations.

Action Required:

- To take advantage of this update, simply **rebuild your configuration in Whelen Command**—no new model numbers, firmware updates, or hardware changes are required.

Please reach out to your Whelen sales representative with any questions.
