

Product Bags Updated with QR Codes for Install Guides

PRODUCT UPDATE • MARKET ADVISORY

MA:0089 • 11/2024

We've made improvements to our product bags which will be rolled out over the coming months starting on December 7, 2024. To make information more accessible and reduce the risk of making instructions illegible if a bag is torn, instructions will no longer be printed directly on product bags. **Each product bag will now include a QR code directing users to a webpage for the most up-to-date product installation instructions.**

To Access An Install Guide:

1. Open your phone's camera or QR code reader app.
2. Hold your device over the QR code so that it's clearly visible on your screen and wait for the code to scan.
3. Your phone will automatically read the code and navigate to the intended destination or provide a link for you to click.

Please contact Whelen's Technical Support Group with any questions at techsupport@whelen.com.
