

# ION<sup>®</sup> T-Series<sup>™</sup> Lightheads Now T-Series Lightheads

PRODUCT UPDATE • MARKET ADVISORY

MA:0106 • 10/2024

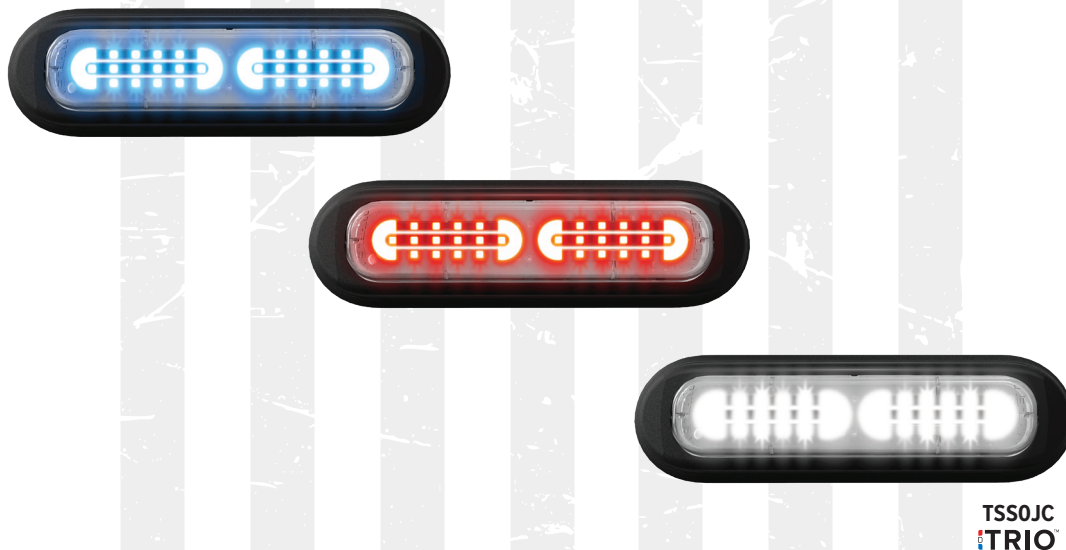

Please note that our popular ION<sup>®</sup> T-Series<sup>™</sup> lightheads are now officially called **T-Series** lightheads. This name change comes as we introduce new models featuring advanced optics and technology, making them even more powerful and versatile than before. Moving forward, ION will be removed from all product literature featuring T-Series lightheads.

These new T-Series lightheads offer improved light output, additional flash patterns, flexible input voltage, and enhanced mounting options, all while retaining the slim, low-profile design that has made the T-Series a trusted solution for emergency services, law enforcement, and public safety professionals.

For those who currently use or prefer the ION T-Series models, rest assured that existing models are still available to order. However, we highly recommend transitioning to the new T-Series to benefit from the latest advancements in LED technology.

New models will be available to order in December 2024 and more information will be shared as we get closer to the official product release. We appreciate your continued support.

Please contact your Whelen sales representative with any questions.
