

24-Output WeCanX® Expansion Module

NEW PRODUCT • MARKET ADVISORY

MA:0125 • 01/2025

A new **WeCanX Expansion Module** to support **Core® control systems** is now available. Designed for users managing complex configurations, this new module offers flexibility and efficiency for demanding lighting applications.

Benefits

Increased Capacity: Supports up to 24 outputs and enables seamless operation of a larger number of lightheads, including up to 8 TRIO® lightheads (3 outputs per lighthead).

Outputs-Only Design: Unlike previous modules, CEM24 simplifies system integration by focusing solely on outputs, making it a streamlined solution for lighting-heavy applications.

Reliable Performance: Equipped with short circuit and over-temperature protection, diagnostic current reporting, and low-power mode for optimal durability and efficiency.

Dynamic Lighting Features: Supports Dynamic Variable Intensity™ (DVI™) flash patterns and Cruise Mode for advanced lighting control.

Wide Voltage Compatibility: Operates on 10-30 VDC, ensuring seamless integration with a variety of vehicles and systems across global markets.
