Features

DUO and WeCanX Technology: This is the first Towman Package offering DUO and WeCanX technology for a customizable lighting setup and true system synchronization.
Core-C® or Core® Control Point: Our powerful Core system integration provides full customization and seamless management of your lighting setup.
Tow-Specific Lighting Configurations: Custom-designed for optimal warning signals on the road, ensuring tow operators are visible from all angles, enhancing safety and allowing approaching drivers more time to slow down.

Separate Front and Rear Control: Front and rear warning lights operate independently, allowing tow operators to adjust lighting based on the situation and optimize on-scene visibility.
Brake/Tail/Turn Signaling Integration: Rear-facing LED B/T/T lights are wired directly to the vehicle with an external cable, providing an easy connection and ensuring vehicle signals are prominently displayed.
